Ness LLC Proposal for: 17568 N. Franklin Blvd. Nampa, Idaho 83687

February 11, 2020

What to expect with a Mold Remediation Project:

- ✓ Access is key! We will need admission Monday through Friday, 8 am - 5 pm while the project is in progress. Ness is bonded and insured. It is not necessary for a home owner to be present while the work is being done. If you are comfortable with it, please make sure we have a house key or garage code for entry. The easier the access is for our technicians, the faster the job goes!

- ✓ All access to the affected areas will be protected by plastic sheeting during work.

- ✓ Mold remediation will typically take 5-7 days and sometimes 5-10 working days, depending on the scope of work and scheduling.

- ✓ We don't always schedule for consecutive days. This is a normal part of our process. Fans may need to run an extra day or two to dry down surfaces and atmosphere.

- ✓ Please note that we are almost two weeks out in starting new projects. If signed and returned within 24 hours, your estimated start date will be some time during the week of February 24th. We will contact you for access if we can start sooner.

RESTORATION PROPOSAL for the Attic at 17568 N. Franklin Blvd. Nampa, Idaho 83687

Ness, LLC is an IICRC council certified Mold Remediation Contractor, licensed, bonded, and insured with mold and environmental pollution endorsements.

As requested, the crawlspace, upper attic and mechanical platform in the garage was inspected. At this time, there does not appear to be a drainage issue in the crawlspace or any visible mold. We do recommend calling Marv's Insulation (208-898-9400) or Acme Insulation (208-376-5449) to clean up the debris, lay down new vapor barrier and clear the foundation vent wells. In the attic, there was visible mold on the roof sheathing and the west gable wall that will need remediation. The mechanical platform in the garage had some visible microbial growth that will need remediation as well. See the recommended scope of work below.

Part 1: Attic Remediation

1. All access to the attic will be protected during work.
2. The furnace/AC system is to remain off during the work and for 3 hours after treatment.
3. Establish negative air flow. This will be ongoing while the work is performed.
4. Surface cleaning and abrasion removal, as needed and treat impacted roof sheathing and west gable wall. (See Part 2)
5. Seal penetrations that are accessible.

Part 2: Microbial Growth Remediation

1. After containment is set up, then surface cleaning and abrasive removal will be performed, as needed, of visible microbial growth on the impacted roof sheathing and west gable wall. Once mold impacted surfaces are cleaned, then treat the remediated surfaces in the attic with a non-toxic Microbial Growth Inhibitor.
2. (1) Procedures are established from IICRC S520 Standard and Reference Guide for Professional Mold Remediation. (2) All work in the attic will be performed using accepted procedures. (3) Respiratory Protection is in accordance with the OSHA respiratory protection standard (29 CFR 1910.134) for the remediation. Gloves, full-face respirators, p-100 particulate filters, Tyvek full body suits with hoods and boots.
3. Photo documentation of work performed is available at the end of the project upon prior request. Disposal of debris.

Total Labor & Materials: ----- Parts 1 – 2 = \$2,396.18

Part 3: Mandatory 3rd Party Certified mold inspector's visual inspection and documentation of the attic.

****Final Clearance Air Testing not included in protocol or scope****

ADD to Total = \$185.00

Part 4: Mechanical Platform Remediation

1. All access to the garage will be protected during work.
2. The furnace/AC system is to remain off during the work and for 3 hours after treatment.
3. Establish negative air flow. This will be ongoing while the work is performed.
4. Surface cleaning and abrasion removal, as needed and treat impacted surface of mechanical platform and wall. (See Part 5)
5. Seal penetrations that are accessible.

Ness LLC give a **5-year limited warranty** on no visible microbial re-growth where work is done. Warranty is **void** if any water or water source introduced into the area.

Work under this proposal is limited to the items listed. Any additional work will need to be outlined and set out by a separate contract, or have the contract amended and signed to reflect any additional work desired.
