Ness LLC Proposal for: 651 N. Ramey Creek Ave. Star, Idaho 83669

August 24, 2019

What to expect with a Drain Install????

- ✓ Access is key! We will need admission Monday through Friday, 8 am - 5 pm while the project is in progress. Ness is bonded and insured. It is not necessary for a home owner to be present while the work is being done. Please make sure we have a house key or garage code for entry. **The easier the access is for our technicians, the faster the job goes!**

- ✓ All access to the crawlspace will be protected by plastic sheeting during work.

- ✓ Installing a drain system is a 10-17 day process, depending on drying time. Please plan accordingly.

- ✓ The AC will need to be shut off during treatment for mold and will need to be off for at least 3 hours.

- ✓ Fans need time to dry the area. **We don't always schedule for consecutive days.** We try to give as much notice as possible but last minute schedule changes can and do occur.

- ✓ **Please note:** If a signed contract is returned within 24 hours, your estimated start date will be some time around Oct. 28th. Please plan accordingly. If there are any cancellations, you will be moved up in the schedule and contacted for access.

- ✓ We have now extended our warranty for sump pump drainage systems to 10 years!

PROPOSED WATER DRAINAGE for the crawlspace at 651 N. Ramey Creek Ave. Star, Idaho 83669

Ness, LLC is an IICRC council certified Mold Remediation Contractor, licensed, bonded, and insured with mold and environmental pollution endorsements.

Based on the visual evidence that there is a history of seasonal water intrusion and standing water in various areas, a drain system is recommended. There did not appear to be any visible microbial growth, at this time, but the view was limited due to standing water in some areas. If any microbial growth is discovered, while the recommended work is performed, the owner will be informed immediately, and a bid will be provided for remediation. There are several voided areas that will need to be backfilled with bagged soil. This will be compacted and graded toward the drain system. Some of the vapor barrier is in fair condition but most of the plastic will need to be replaced.

Part 1: Drainage (*Digline will be contacted to mark all utilities*)

1. All access to crawlspace surfaces will be protected by plastic sheeting during work.
2. Preliminary digging and pumping to remove excess water, as needed.
3. Set up negative air machine and additional fans, as needed, for dry down.
4. Additional fans will be installed for dry down, as needed.
5. Clear all insulation and debris from foundation vents for air flow.

Part 2: Directions given facing the front door from outside.

1. Install a fabric lined graded drain system below the bottom of the footings along the entire interior perimeter of the crawlspace except for behind the main entrance and part of the garage.
2. Drain in crawlspace will collect into a sump tank located in the back-right corner of the crawlspace.

Part 3: Install sump pump with insulated lid in the back- middle area of the crawlspace. Sump will discharge through a drain line to a dispersal bed towards the front-right landscaped area. (The sump pump discharge line will not be visible from the outside of the house. Installation of electrical outlet with audible alarm is included.)

Total Labor & Materials Parts: 1-3: \$4,878.12

Part 4: Ness will remove and dispose of old damaged portions of vapor barrier, miscellaneous debris and building materials. Install new 6 mil. vapor barrier, where removed, in the crawlspace and pull up onto the footings, where possible. **ADD to Total: \$840.07**

*>> 50% down and 50% paid upon completion <<
>> 3% charge on credit card transactions <<*

Parts 1-3 Accepted by: _____ **Date** _____

Part 4 Accepted by: _____ **Date** _____

Please print name: _____

Ness, LLC gives a **10 Year Warranty** on sump pump and drain system for no standing water (as per signed contract) on the crawlspace floor where drain was installed from ground water seepage and rain/snow. This Warranty is Transferable to new home buyer within warranty period. Drainage Warranty excludes water standing on the crawlspace floor from flooding that is not part of ground water seepage from irrigation or rain or due to, interior home appliances or plumbing leaks. Furthermore, Ness, LLC is not responsible for any future landscape changes that may disrupt the system. A Service Charge applies for *non-warranty* issues.
