PROPOSED Drywell in backyard at 6006 S. Sturgeon Way Boise, Idaho

Part 1: Install drywell in back-left area of the backyard. Graded trenching will be connected to drywell.

When we start, the existing conditions of the landscape will be photo documented for conditions of the sod and surfaces where we will work. Please note: There may be discovery, once excavation is performed, that is beyond this scope of work. At that time, all work will stop until a change order is drawn up and signed.

1. Digline will be contacted to mark utilities.
2. Remove fence panels on the left side of the house for excavator access.
3. We will dig three trenches and connect to drywell in back-left area.
4. Trenches will be approx. 12-16 in. deep and 12-16 in. wide and lined with fabric before installing perforated pipe.
5. Perforated pipe to be covered with landscaping cinders and sandy soil.
6. Owner will be responsible for replacing sod that is removed from the trenched areas.
7. Connect trenching to drywell:
 - i. Excavate pit down to drainable soils or 7ft deep
 - ii. Line pit with fabric and install 8" access pipe.
 - iii. Backfill with rock
 - iv. Lid to be installed on pipe at the surface for easy access
8. Ness is not responsible for any landscaping except for the gravel and soil in the trench.
9. Haul away excess soil if not needed.
10. Re-install fence panels.

Total Labor & Materials Part 1 = \$7,032.08

*50% down and 50% paid upon completion
